

ABOUT

I have a passion for *design* and enjoy using my experience in e-commerce to create websites and apps that are user-friendly and accessible. I work well both independently and in a collaborative environment – and thrive in both.

Experience

Frontend Developer 2024 — PRESENT

Fishtank Consulting

I work within small developer teams to create big solutions for clients using Sitecore. I predominantly work with Next.js and Typescript, often using Tailwind for styling and Storybook for testing.

Jr. Web Developer 2020 — 2024

Globacore

I worked as part of a team creating interactive experiences for both virtual and in-person events. I primarily used React and Next.js to develop these experiences, with the majority of the work being frontend. I was, however, able to delve deeper into the back end through R&D opportunities between projects.

Digital Service Squad Member (*Contract*) 2020

Digital Main Street

I worked with the Clarington Board of Trade and the Business Advisory Centre of Durham, in partnership with Digital Main Street, to assist businesses in accessing the grants and programs offered by Digital Main Street. I also assisted businesses with e-commerce consultation to ensure they got the most out of the program.

Online Specialist / Sales Coordinator for Corporate Markets 2017 — 2020

Swissmar

I managed the Borner and Swissmar Shopify stores as well as the Amazon Seller Central accounts for both Borner and Swissmar. I also managed the Google Ads account for both companies.

Skills

React / Next.js

Typescript

REST API

Sitecore

Strong Communicator
